**DETAILED ACTION**

***Election/Restrictions***

Applicant's election without traverse of group II in the reply filed on 10-25-05 is acknowledged.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Kataoka.

Kataoka teaches plural stations (modules) connected to two serial buses and they are permitted to occupy a first serial bus in a predetermined order under control of a bus controller. A second serial bus is used for transmitting to the bus controller an urgent bus occupancy request issued by any of the modules. The system selects one bus and isolates the other in response to detected bus controller faults (see last line of abstract).

***Allowable Subject Matter***

Claims 8-15 and 22-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The above mentioned claims do not teach the much more detailed limitations recited in the dependent claims that relate to the operation of the serial bus control arrangement.
